

FEATURES

Used for cutting processes of metal profiles

- Robust spring system and safety barrier
- Speed selection based on material characteristics thanks to the double speed motor
- Ability to prevent the saw blade from heating and remove sawdust from the cutting surface with coolant
- Angle working 45° and 90° all degrees in between
- Manual clamps

Standart Equipment

- Ø 315 mm saw blade
- Material gauge with roller
- Stand
- Cooling oil pump
- Quick clamp
- Tool bag

Technical Specifications	Unit	Value
• Circle 0°	mm	95
• Circle 45°	mm	90
• Square 0°	mm	80
• Square 45°	mm	75
• Rectangle 0°	mm	110x65
• Rectangle 45°	mm	85x75
• Cutting Speed	rpm	44/88
• Saw Blade	mm	315x2.5x32
• Cooling Motor	W	90
• Spindle	kW	1.1/1.9
• Weight	kg	120
